Problems

insufficient library staff

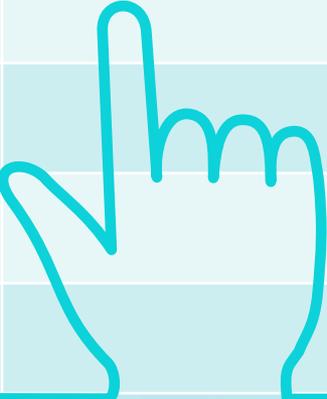

knowledge gap

lack of institutionalized
training on Open Science

LIS curriculum

Main courses	Elective courses related to	Courses related to OS
Library science, Bibliography, Theory and history of bibliography	A specific foreign language	Information structure
Ethics in Science and Culture	Literature	Information retrieval
History of books and libraries, Books and libraries in the Serbian national context	Culture	Databases and library information systems
Information science for librarians, Statistics in libraries, Digital text, Multimedia documents		
Research and citation methodology, Knowledge organization		
Management processes in libraries, Public relations		
Archival science, Museology		

Librarian Licensure Examination

Courses and exams	Exams related to OS
Constitution and legislation related to libraries and heritage; Library administration	Introduction to information science (very general)
Library science	
Cataloging and classification	
Bibliographies	
History of books and libraries	
Conservation of library and archive materials	

Certified professional development courses for librarians

Courses	Training related to OS
Wiki-librarian	Communication on the Internet: Open Science in the Service of Society
Searchable digital collections	Linked Open Data (in the context of catalogues)
Democratization of digitization in libraries	Copyright in library and information activities: copyright and the Internet (theory only)
Free multimedia tools	
WordPress	
Marketing	
Stress management	
Gamification	
Google tools

Repository Managers

Researchers

What's next?

- Expanding the training programme in a modular manner, by clustering related topics around the core programme (the so-called formal part);
- Involving a greater number of trained repository managers in informal training;
- Community building;
- Revising and organizing training materials;
- Making steps towards institutionalizing training for Open Science.
